

## **Northwest Territories Power Corporation**

### **REQUEST FOR EXPRESSION OF INTEREST #21201**

### **NEW DIESEL GENERATING MODULAR POWER STATION COLVILLE LAKE, NT**

The Northwest Territories Power Corporation (NTPC) will, around mid-May 2012, tender for the design, installation, commissioning and testing of a new diesel generator power station to replace the existing power station and to provide continuous power in the community of Colville Lake, NT.

Colville Lake is a remote community of about 150 people whose electricity requirements are met by a diesel power plant owned and operated by NTPC. It is located on the south shore of Colville Lake and is accessible only by winter road or by air. The community is situated 750 kilometres northwest of Yellowknife and is at an altitude of 244m above sea level. The annual average electrical load is estimated at 50 kW with a typical peak of 130 - 150 kW and a minimum load of about 20 kW.

All requests for pre-qualification shall be delivered to NTPC at 8 Aspen Road, Hay River, NT X0E 0R6, attention Tammy Schofield, on or before **12:00 hours on March 30, 2012**.

Expression of Interest document will be available on **February 13, 2012**. Please fax or email request for document to:
