

With NTPC's new, easy-to-read bill, you can better manage your power costs.

This new bill contains features that can:

- help you **track** how much power you use each month.
- tell you how close you are to keeping your power below 700 kWh to ensure the **largest subsidy** and lower power cost.
- help you lower your costs thanks to monthly energy **saving tips**.

NORTHWEST TERRITORIES
POWER CORPORATION

Billing Date: 07/12/2006
Due Date: 28/12/2006
Billing ID: 2001 Seq: 1200

John Doe
Box 5000
WHA TI NT X0E 1P0

Energy Tip
Refrigerator freezers use more electricity when ice builds inside. Periodically defrosting your freezer saves energy.

Amount Paid This Bill By GNWT: **\$496.17**

Account Number	Service Address	Bill Cycle	No. of Usage Days

Make cheques payable to: NTPC
Please include your account number on your cheque
Please indicate any changes of address in box below

NTPC GST Registration # 122256506

Look for energy saving tips and news.

Quickly locate how much power you used this month.

See how much you paid for electricity, and what amount was subsidized by the government.

Compare how much power you used this month to what you used last month, and during the same time last year.

Energy Saving Tips

Using the following and other energy saving tips found at www.ntpc.com can help keep your power use within the 700 KWh subsidy, keeping your power costs low.

What to do	Change regular lightbulbs to fluorescent ones.
Savings	405 kWh over the life of the new bulb.
Extra benefits	The same amount of light for more time and less money.

ntpc: giving you the power to save money.

Energy Saving Tips

What to do	Plug your car for just three hours instead of all night.
Savings	Up to 30 kWh a month.
Extra benefits	Your engine will still be warm enough to start.
What to do	Set your electric water heater to 40°C and change your shower head to a low flow one.
Savings	As much as 125 kWh per month.
Extra benefits	You'll also save on the amount of water you use.
