

Tuktoyaktuk Service Upgrades April 12-23, 2010

NTPC is continuing service upgrades in Tuktoyaktuk. These upgrades will improve your power quality and reliability.

From April 12th -23rd, approximately 50 residential properties will experience one outage, lasting 1-2 hours. Remaining Tuktoyaktuk residents will receive upgrades later this spring. NTPC's Richard Cockney will knock on your door just before the outage takes place to let you know your power will be off.

We understand that some residents may have special circumstances. If you wish to make us aware of your needs ahead of time or if you require further information, please contact Kerry McKinley at (867) 777-7701.

Thank you for your cooperation as we complete this important upgrade in your community.
