

Fort Resolution – Outage Thursday, Nov 11

Due to damage during recent wind storms, NTPC will conduct transmission line repairs on Thursday, Nov 11.

To enable safe work, Fort Resolution electricity supply will be switched from hydro to diesel generation around 11:00 AM.

The switch to diesel will require a 5-10 minute outage and the community will be supplied by diesel generation for the remainder of the day.

We will restore hydro generation as quickly as possible. There should be no other interruptions in service during the day.

Thank you for your cooperation and we apologize for any inconvenience.
